Shanghai By Japs

(BULLETIN)  
(International News Service)  
SHANGHAI, Nov. 30.—Temporarily halted by diplomatic pressure in her attempt to seize the rich Chinese customs, Japan threatened to precipitate a new international incident today by capturing a number of launches flying foreign flags in the Whangpoo river off the Bund. One of the craft flew the Stars and Stripes while two carried the Italian colors. The American consul lodged an immediate and energetic protest with Japanese authorities.

Reason Not Clear  
Reason for the seizure was not made clear immediately, but it was assumed the launches had failed to comply with new Japanese policing regulations governing the International Settlement.  
Meanwhile, consular officials stated negotiations were proceeding satisfactorily with Japan for future administration of the customs, which form the bulk of security for Chinese loans abroad.  
A Japanese officer visited International Customs Inspector Lawford and while outcome of the interview was not disclosed, it was understood the latter informed his caller of the (Continued On Page Two)

### PA NEW OBSERVES

Evidences of the holiday spirit are accumulating in the downtown business section. On Saturday the crowds of shoppers were the largest seen on the streets of this city for some time. In some places it was necessary to push in order to get through the crowds on Washington street. There were fair sized crowds out Monday and today, with indications of a good shopping week.  
Local realty men and contractors are interested in the efforts being put forth in Washington to stimulate building activities. New Castle, along with other cities in the country, is short on houses, particularly to rent. While there has been some increase in rents here, the rates have not advanced sufficiently to warrant building for rental purposes.

This is the time of year when thousands are fishing for information as to what a friend or relative would like to have for Christmas. Some are very adroit in their questioning, seeking to get the desired information, without arousing suspicion; others come out boldly and ask for a list of articles that the person addressed would like to have. This seems to be the most popular method, especially among the members of one's own family. If asked to make a list be sure you make it long enough.

A well known newspaper commentator says "we now get nowhere in a fraction of the time formerly required to get somewhere." Isn't it the truth. We saw a fellow driving up Washington street yesterday as though he were going to a fire or a friend was dying. A few minutes afterwards we found him chatting on a street corner. WASHINGTON, Nov. 30.—Both senate and house swung into action today for passage of the Wagner-Steagall building boom bill as urged by President Roosevelt in his special message to congress.  
While the senate banking and currency committee was making plans to begin public hearings on Wednesday, the house banking committee launched its hearings today, with Stewart McDonald of the federal housing administration among the first witnesses.  
Testifying on the president's recommendations, which envisage 16,000 million dollars spent on new dwellings by private capital in the next few years, will be representatives of the Federal Reserve board, treasury department, Reconstruction Finance corporation and other governmental agencies.

HARRISBURG, Nov. 30.—Pennsylvania employers today were given a month's "grace" period in which to comply with the new 44-hour week law.  
It came as an 11th hour "breath" for industry.  
Extending "in effect" the Dec. 1 deadline set by the 1937 legislature under the act, the state industrial board announced all employers affected by the law or regulations set up by the department of labor and industry will have until Monday, Jan. 3, 1938 to conform with the act.

Blanket Variation  
The board also granted a blanket variation classification for all employers employing three or less workers. Designed to protect the small proprietor, the ruling permits these employers to operate on a 54-hour week, nine hours a day and six days a week, pending further board study.  
"This variation classification may be changed later on after we have a chance to observe how it is working," Ralph M. Bashore, secretary of labor and industry and chairman of the board explained. Of the "grace period," Bashore said:  
"The period is in accordance with the policy of the department. We realize employers must have some (Continued On Page Eight)

### Tear Gas Bomb Halts Concert

Dropped Into Auditorium During  
Performance Of Kreisler  
At Ann Arbor, Mich.

(International News Service)  
ANN ARBOR, Mich., Nov. 30.—Tear gas bomb thrown from the balcony of Hill auditorium last night during the concert of Fritz Kreisler, world-famed violinist, today was described as a "freshman prank" by University of Michigan authorities.  
The bomb, thrown into the audience on the orchestra floor, halted the concert for several minutes while ushers opened all doors to clear the tear gas from the auditorium.  
Kreisler, who had just completed his second selection of the concert, remained on the platform to avert a possible panic as approximately 50 persons fled the gas in a rush. He usually leaves the stage after the second number.  
Kreisler continued the concert after the tear gas was cleared from the auditorium and the 50 persons who rushed outside had returned to their seats. He left after the concert for Detroit, where he is scheduled to appear tonight.

### Given Freedom

MRS. MARIE PHILLIPS  
Mrs. Marie Phillips, above, former Olympic gymnast, and her friend, Mary K. O'Connor, the latter charged with slaying a five-year-old girl, were freed of a morals charge in Philadelphia. Both girls were arraigned shortly after Miss O'Connor was held without bail for the coroner on a charge of homicide in the death of the girl, Nancy Glenn, last Labor Day. Mrs. Phillips was projected into the case when Miss O'Connor told her of the slaying and she kept it a secret until a few days ago.

(BULLETIN)  
(International News Service)  
PITTSBURGH, Nov. 30.—A widower and another man's wife were found shot to death today in an automobile in a lonely "lover's lane" section in Ross township on the outskirts of the city.  
Police said the man, William Harrison Forsythe, 55, of Avalon, had apparently killed the woman, Mrs. Rosalia Karr, 30, mother of a nine-year-old daughter, and then ended his life with a deer rifle found in his hands.  
Where the couple had met, where they had gone and the motive for the shootings were questions the families were unable to answer.

Mrs. Karr's husband, Ralph, 33, had been released from the Allegheny General Hospital Sunday after recovering from serious injuries suffered in an automobile accident and his condition was so weakened friends were afraid to tell him the news.  
Her face horribly mutilated by the shot, Mrs. Karr lay dead on the front seat beside Forsythe. The father of four children, Forsythe had lived in the home of his daughter, Mrs. Sara Richardson, last night with the remark that he would be back in a short time.  
Mrs. Karr had left her rooming-house apartment about noon, remarking that her husband, who had just been released from the hospital, was "all right."

### HUNTERS URGED TO USE CAUTION

(International News Service)  
HARRISBURG, Nov. 30.—Caution was the word today for Pennsylvania's army of deer hunters as the death toll for the buck season's opening day reached five persons, including a 14-year-old boy. One of the victims, however, died of a heart attack.

The lad slain was Robert McLaughlin of Philadelphia, found wounded in the Pike county woods. He died shortly afterwards. His gun had discharged while being dragged over the ground.  
Second gunshot victim was Michael Reeba, 25, of McAdoo, who succumbed in Wellboro hospital from a bullet wound in the abdomen while authorities held another hunter, John Sacksa, 27, of Shippen, also Schuylkill county, for investigation in the death. District Attorney Charles M. Elliott said Sacksa told him that after failing (Continued On Page Two)

### PITT NOT TO PLAY AT BOWL

(International News Service)  
PITTSBURGH, Nov. 30.—Pitt's rejection of a possible bid to the Rose Bowl game was made absolute today when all attempts to stage another meeting for a consideration of the 16 to 15 vote by which the players turned their backs on the coast invitation yesterday failed to materialize.  
Attempts by some of the players and interested alumni for a reconsideration died aborning with reports the bid was going to Fordham anyways.

(BULLETIN)  
(International News Service)  
SHANGHAI, Nov. 30.—Precipitating a situation without parallel in modern times, Japanese naval officers seized an American-controlled steam launch off the French bund today, tore down its American flag and hurled it into the Whangpoo river.

The vessel was the Peiting, owned by the China Foreign Steamship Company. It was anchored in the Whangpoo in international settlement waters.  
William Hunt, head of the China Foreign Steamship Company, immediately informed United States Consul Clarence E. Gauss of the incident.  
Gauss promptly lodged a two-fold protest with the Japanese, one against an insult to the stars and stripes and the other against seizure of American property.

Washington, Nov. 30.—Secretary of State Cordell Hull today at his press conference declined comment on news reports from Shanghai that Japanese military authorities had seized an American-owned launch and thrown the American flag into the river.

# Seek To Speed Up Tax Revision

## Congressmen Oppose Delay

Business Men To Meet In Washington To Frame Revision Program

HARRISON SAYS REVISION SURE

By WILLIAM S. NEAL  
International News Service Staff Correspondent  
WASHINGTON, Nov. 30.—A revolt against the administration's decision to defer tax revision until January broke out in the house today.

Rep. Alfred Better (D), of New York led the movement by placing on the speaker's desk a petition to discharge the ways and means committee from consideration of his bill to modify the undistributed profits tax.

### Seeks Early Vote

He called upon 218 members of the house to sign the petition and thus assure a vote on the measure on December 13 under house rules. Meantime, it was learned that 50 business men from all parts of the nation will meet in Washington this week to frame a program of tax revision to stimulate and combat the recession.

In spite of declarations of administration leaders that it is impossible to frame and pass a tax bill in the special session, the cry for immediate revision of the profits and capital gains taxes continued.

Senator Harrison (D) of Mississippi, chairman of the senate finance committee, sought to assure the country of tax relief in a speech last night. Harrison blasted hopes of some advocates of tax revision for a retroactive bill effective for the tax year 1936. He said such a bill would be opposed by many business men because it would penalize those who have paid out large dividends.

The Better bill would give corporations credit on their 1936 taxes for all amounts spent for improvements, expansion, payment of debts, and purchase of real estate. "The undistributed profits tax should be modified to give business relief immediately and start an upward spiral," said Better. "I believe a majority of Congress wants prompt revision. If 218 members sign my petition, we can get the relief."

Should Encourage Business  
Senator Harrison, in his speech, declared the undistributed profits and capital gains taxes have reached the point of diminishing return. He promised modification of both.

Declaring that the government should adopt a tax policy to encourage business, Harrison said:

"While the policies adopted by the government for relief to the unemployed have ameliorated human suffering and brought relief to millions, the problem is still with us, and if the unemployment problem is not solved, and solved permanently, it must be through the wholehearted cooperation of private business."

"I believe, therefore, that an incentive should be given to business to take up as much as possible of the slack of employment. We cannot give this incentive by imposing excessive or punitive taxes. If such a tax is imposed upon an industry as to make it impossible for it to pay its debts or to expand its business, serious consequences result."

Harrison said the next tax bill will be effective as of January 1, 1938.

## FIVE DEAD ON FIRST DAY OF DEER SEASON

to arouse any response to shouts he fired into some bushes from which he heard a noise. He reported the shooting after helping bring the wounded man here.

Elmer Boyer of Shelocta, Indiana county, was the victim believed to have collapsed from a heart attack. He was found near New Florence, not far from the spot where his gun was dropped against a tree.

Maurice E. Faller, 65, of Donora died of a heart attack in a hunting lodge near DuBois shortly after returning from a trek for deer. Mrs. Clara Bell Johnson, 48, of Mahaffey was similarly stricken as she started to drive home in her car after taking her husband to DuBois on a hunting trip. She died in a nearby home.

Deer herds were reported extensive throughout the wooded mountainous regions of the state with the first day showing its usual heavy kill of antlered bucks. Seth Gordon, executive secretary of the game commission, estimated there were 200,000 hunters in the field yesterday.

## PA NEW OBSERVES

(Continued From Page One)

every motorist has had some one pass him in a great hurry, only to park his car a half a block away. That's what fills our hospitals and gives the coroner something to do.

So far as Pa Newc has been able to learn few of our local nimrod were able to bag a black bear during the brief hunting season. In this connection it may interest you to know that Pennsylvania was the first state to protect the black bear. This was in 1905. Reports from the game commission show that in 1924 more black bears were killed in Pennsylvania than in all the other states combined. Bears weigh from 250 to 300 pounds as a rule, but occasionally double those weights.

In his sermon on Sunday a local pastor regretted the decadence of the family altar in the home. Most any old resident of Lawrence county, especially if a church member, will tell you that in the early days when he or she were children Bible reading and prayer, morning and evening, were the regular routine of a great percentage of Christian homes. As a result there were fewer unhappy homes and broken families. Modern life has wrought many changes, many of them for worse.

Gallantry is in reverse among the deer along the Slippery Rock Creek. Instead of the males protecting the females, the does are protecting the bucks. Over the week end one lone buck was seen surrounded by five does. Apparently the does know that hunters won't shoot them.

Dr. T. M. Shaffer of Lincoln avenue continued his yearly record of getting a deer on Monday when he brought down an eight point buck near Marienville, Pa. With him was his brother W. G. Shaffer of Lakewood, Ohio. Dr. Shaffer's buck weighed 150 pounds, while that of his brother weighed 120.

Porcupines have never been common to Lawrence county. Fact is the record shows none ever caught around here, that is up until Monday afternoon. Sitting in an upstairs window in the home of Mr. and Mrs. Frank S. Breneman, Mrs. Henry Breneman noticed the porcupine in a tree. Game Protector Frank L. Coen was called and took the peculiar animal to the game farm at Harlansburg.

"A Suggester" suggests to Pa Newc that the State Game Commission take the albino deer, which was injured when it ran into a farm wagon on the R. B. Cowher farm, on the Youngstown road, and keep it with the intention of breeding a race of white deer.

Tino Guiducci of Butler avenue came home yesterday with a 12-point buck shot in the vicinity above Oil City, Pa., near Plumer. The deer was shot about 2 o'clock.

Joseph Rickel of 806 McCleary avenue bagged a five-point buck up Monday morning in Clearfield county. Rickel, with a party from New Castle, left here on Sunday morning.

Wings are nice things, but on a bitter cold night who wouldn't rather have a fur coat? "Them's the sentiments" of a certain pigeon Pa Newc knows, at any rate. This pigeon, who lodges somewhere on the First M. E. church roof, has been in a frenzy of activity during the past several days in an effort to

"fur-line" her nest. She gets her twigs from the roof of a Mercer street house and makes hundreds of trips in the getting. Sometimes an impudent little sparrow follows her just for the sport of the thing, irritating the pigeon no end. On those occasions the twigs are dropped in efforts to nip the little intruder in the tail feathers.

Edward Cox of 1809 Highland avenue can feel well rewarded for his past years of futile hunting for big game, for on Monday afternoon four-point deer at Marienville, weighing 200 pounds. Cox, with John Porter of Mahoningtown, Stan Cox of Cedar street and several others from here, left on Monday morning for their hunt. The Highland avenue resident returned home while the others in his camp remained to continue their search for big game.

Deer hunters appeared to have been quite successful the first day's hunt in the Pennsylvania mountains, judging from the number of cars seen going through the city with deer on the running boards. Three cars with deer on them were noted in the public square at one time on Monday afternoon.

New bridge built across the Little Neshaunock on the New Wilmington and Volant road, which has just been thrown open for traffic, is quite a substantial looking structure. Made of steel and concrete, and having a sidewalk as well as a roadway, it is a great advance over the frail wood and structural steel span that did duty at the spot for many years. In addition to the new bridge, retaining walls have been built along the river, above the bridge, to protect it.

Jim Walsh, of the South Side, shot a buck in Worth township, Butler county, Monday morning at 10 o'clock. It weighed 180 pounds, Pa Newc is told.

Lloyd Crawford of Kathryn street, bagged an eight point buck on Monday about 9:30 o'clock, in Forrest county, weighing in the neighborhood of 175 pounds. Crawford, with a party of local hunters, left here on Sunday, starting their hunt early Monday morning.

Daniel Hughes of King avenue, went buck hunting for the first time yesterday and was successful in bagging a 185 pound 12-point deer in Venango county. He shot it about 11:30 a. m. Also in the same party with Hughes was Levi Colvin of 416 Pine street, and he shot a 5-point buck. Colvin shot his deer about 2 o'clock.

## CUSTOMS SEIZURE AT SHANGHAI IS HALTED FOR TIME

(Continued From Page One)

grave consequences likely to result if Japanese seizure of the customs is effected. Reliable reports said the Japanese suggested that a large number of employees of the government customs organization to ensure that Tokyo's interests will be respected.

Representations by the United States, Great Britain and France apparently succeeded in blocking Japan's original plan to seize the revenues from being used by China for arms.

Troops Press Forward  
Meanwhile, eager to hurl an artillery barrage on Nanking, China's deserted capital, Japan's legions pressed forward across the Kiangsu plains in pursuit of fleeing Chinese troops.

Advance Japanese troops were reported within 50 to 70 miles of the city which they hope to capture in an encircling maneuver designed to crush Chinese resistance in its coils and end the Sino-Japanese war.

At the same time, Japanese commanders in Shanghai moved to strengthen their military grip on this metropolis, where their action in taking over customs arrangements has provoked protests from the United States and other foreign nations.

It was learned that a crack division of front line Japanese troops will arrive here shortly—and in all probability be stationed here as a permanent garrison. With such a force in Shanghai, Japan will have little difficulty in imposing her will on the city and the International Settlement from a military point of view.

Nevertheless, while the Japanese strengthened their positions here and on the battle front far to the west, advice received in Shanghai indicated the Chinese mean to keep fighting to the last.

Open criticism of the President means (1) he has made mistakes, and (2) his second term will soon be ended.

Many beautiful floral tributes filled the church, and a large assemblage of friends and relatives attended the impressive Lutheran services, further testifying to the high esteem in which the deceased was held. ## CONGRESS SEEKS TO SPUR BUILDING BOOM AS ROOSEVELT URGED

(Continued From Page One)

In giving the legislation a send-off, Senator Barkley of Kentucky, senate majority leader, said he saw no reason why the measure should be considered in committee more than a week.

"I have heard nothing but approval for the president's recommendations," said Barkley. "I believe there is a strong possibility the bill will be passed during the special session of congress."

Unless "unexpected opposition" arises, the Wagner-Stegall bill should be passed by the senate after only one date of debate, Barkley said. Other senate leaders, however, were not so sanguine over the bill's future. That there will be considerable wrangling over details of the measure was forecast by some senators.

Proposals of the president to reduce the interest and service charge of the FHA form 5½ to 5 per cent, should meet with general approval Barkley observed.

Of great assistance in stimulating dwelling construction will be the provision to increase the government-insured mortgages from 80 per cent of the value of property to 90 per cent, thereby enabling home builders to proceed on smaller capital, Barkley said.

## PRESIDENT URGES CUT IN NATIONAL HIGHWAY FUNDS

(Continued From Page One)

January 1 the secretary of agriculture is required by the existing law to apportion to the various states some \$214,000,000.

Since the first federal aid-highway act was enacted in 1916, the president said, there had been spent on public highways more than \$3,100,000,000 of which almost half has been spent under his administration.

Average Higher  
"The annual average" his message stated, "for the past five years of \$298,000,000 contrasts with the annual average of less than \$100,000,000 for the five year period preceding the depression."

In this connection, the president recommended also that congress "consider" the mandatory provision of the present law which requires the secretary of agriculture to apportion to the states all the amounts authorized for expenditures.

"This mandatory provision," he stated, "completely ties the hands of the executive as to the amount of road funds to be included in the budget for any fiscal year."

While I do not object to the apportionment among the states of such amounts as may be authorized for appropriation, I do most strenuously object to the mandatory apportionment of obligations by the federal government under such apportionments without regard to its ability to finance them from revenues.

SENT TO JAIL  
State Motor Police Gibbons last night arrested William Short, Greensboro, N. C., for disorderly conduct outside the city limits of the New Wilmington road. He was committed by Alderman James C. Brice for three days to the county jail.

## REPORT JAPANESE HURL AMERICAN FLAG INTO RIVER

(Continued From Page One)

Shanghai that Gaus had protested vigorously to the Japanese authorities over the seizure.

Under the circumstances, Hull said, he felt it difficult to say anything until the facts are fully revealed.

Unparalleled Incidents  
Shanghai, Nov. 30.—A series of provocative incidents unparalleled in the annals of war were climaxed here today when Japanese naval officers seized an American-operated steam launch, tore down the stars and stripes from its masthead and threw the emblem of United States sovereignty into the waters of the Whangpoo river.

No international conflict has been so studded with dramatic incidents as this latest war between China and Japan.

The World War, except for the submarine campaign, never involved neutrals to the extent the carnage in Shanghai has enmeshed foreign nationals.

For anything approaching a parallel so far as the Far East is concerned, it is necessary to go back to the Boxer rebellion in 1900, when the Dowager empress ordered all foreigners killed and the German minister was murdered.

This led to decisive action by foreign armies and infuriated the Kaiser to the extent of his "yellow peril" speech which made history.

Nothing more than fruitless diplomatic protests however, have followed each successive violation of neutrality in Shanghai. There was a close analogy between the killing of the German minister and the nearly fatal shooting of Sir Hughes Montgomery Knatchbull-Hugessen, British ambassador to China, by a Japanese machine-gunner this summer.

But because the powers have not even admitted that a state of war exists between Japan and China, Britain had to be satisfied with a diplomatic demarche and a half-hearted apology.

A bouquet of yellow mums and pink snapdragons formed the centerpiece, and clusters of the same adorned the rooms throughout. The time following the dinner was spent most informally.

Music was contributed by Miss Mary Clarke and Mrs. Harry L. Gormley, of this locality, adding to the enjoyment of festivities.

# Don't Bully Constipation

Many purgatives over-stimulate your intestines. That's why you suffer from griping. Why not try a NATURAL laxative food—Kellogg's All-Brans?

If you have common constipation, All-Brans will keep you "regular" as the clock's tick. Instead of OVER-STIMULATING your intestines, it gives them two things they need. First, All-Brans supplies "bulk"—it absorbs water and softens like a sponge. This water-softened mass aids elimination. Second, it's a good source of vitamin "B"—the amazing vitamin that tones up your intestinal tract.

Eat crunchy, toasted All-Brans with milk or cream and fruits. In muffins it's delicious. But however you eat it, use it REGULARLY: eat two table-spoons of All-Brans and drink plenty of water. If you do this every day you can avoid common constipation and catarrhs, too! Made by Kellogg in Battle Creek. At every grocer's.

## THIN BALONEY

NOTHING seems to have caused greater agony to Uncle Sam's camouflaged free traders than the statements of Senator Capper to the effect that Cordell Hull's reciprocal farm treaties are doing the farmers of the United States no good.

There have been wails from free trade professors and internationalist newspapers to the effect that what the Kansas Senator tells us isn't true. They have cited the prices of grains and livestock to show that they were higher in 1936 than they were in 1933. Everybody knows this. Unfortunately, however, Mr. Hull and his star-gazers have been unable yet to establish the contention that the trade treaties made by the United States with other countries had anything to do with the rise in prices. Such rise, of course, was due not to Mr. Hull and his treaties but to a world-wide return toward prosperity and a world-wide scarcity in supplies. There are more trade treaties in effect this year than last, yet farm prices are lower now than they were in 1935. How come? A world-wide increase in supplies and a recession in buying power have caused this.

A complete answer to the Hull alibi was given recently in an address at Harrisburg by Louis J. Taber, master of the National Grange. Mr. Taber said, among other sensible things:

"We rejoice in the revival of world trade, but when we confine it strictly to farm schedules we find this startling fact for the first six months of 1937:

Agricultural imports ..... \$1,151,038,222  
 Agricultural exports ..... 435,099,385

Agricultural trade deficit ..... \$ 715,938,837

Now if the lowering of the tariff on farm products and other commodities in exchange for promises from abroad have helped the farmers, it is a little difficult to explain away these figures.

Did the reciprocal trade treaties which are constantly increasing our imports of farm products and our unfavorable farm trade balance raise the price of farm commodities in 1936 over those of 1932, a situation to which Mr. Hull points with pride?

Of course the artificial and naturally produced scarcity of our farm crops had something to do with our exports. And scarcity brought about the increases in price. Mr. Hull knows this as well as the rest of us do.

## LYRICIST OF THE OLD MILL STREAM

Every so often a song comes into the world that, for somewhat mysterious reasons, makes a ten-strike in popular appeal. Thus, to say that Tell Taylor has passed to his reward has but limited meaning; but to add that he was the author of "Down by the Old Mill Stream" starts thousands of Americans humming in grateful recognition.

Perhaps it is the simple melody of this song that has sent it into 4,000,000 copies, caused it to be played about 6,000 times on the radio and made it the runner-up to "Sweet Adeline" in the favor of barber-shop harmonists and convivial souls. Or, perhaps, it is the gentle nostalgia induced by the words:

"Down by the old mill stream, where I first met you,  
 With your eyes of blue dressed in singham too;  
 It was there I knew that you loved me true—  
 You were sixteen, my village queen,  
 Down by the old mill stream."

Let the classicists jeer as they may, there is something about this song, crowned by tremulous tenors and sonorous basses at the proper time and place, which brings back to many a hard-bitten mortal memories buried under the dust of years and moves strong men to a state perilously bordering on a display of emotion.

## AMENDMENTS PROPOSED—107

If Congress ever finds time hanging heavy on its hands, it can take a look at the lengthy waiting list of proposals for amending the Constitution. There are 107, according to latest report, but the number may be added to any day.

The strength of the movement for a popular referendum before a declaration of war is shown by the fifteen resolutions for an enabling amendment. There are thirty-two proposals relating to the composition or procedure of the Supreme Court. Nine different proposals for constitutional amendments would give Congress an even freer hand in distributing cash to the farmers.

Most proposals for constitutional amendments never get to first base—in other words, to a vote for submission to the Legislatures, or as in the case of prohibition repeal, to conventions in the several States. A two-thirds affirmative vote in each House is essential to submission. Only eleven amendments have been adopted in addition to the original ten, the Bill of Rights.

Oddly enough, the States have been indifferent to their power to force Congress to call a convention for proposing and submitting amendments, a procedure that could be effected by joint action of two-thirds of the Legislatures. Reliance has been placed on the national legislators to submit any needed amendments to the Federal Constitution, an authority which has operated to check needless tinkering with the fundamental law.

## The Parent Problem

## SARCASM UNFAIR WEAPON

Speaking before about 3,500 teachers at the annual meeting of the Minnesota Education association, at Saint Paul, a little while ago on the subject, "Mental Health in the Classroom," I pleaded for serenity in the home and school as a means of checking the awful toll of mental illness in our nation. And I said that as long as I can speak and use a typewriter I am going to keep on with this plea.

Near the end of my address I also said:

"And being human, we teachers and we parents are inclined to make fun of children. Very few of us do so on purpose. We just do it for about the same reason that a dog wags its tail—it makes us feel good; and the more pain we give the child the more pleasure we get (unaware)."

"When I laugh at some serious question or remark of yours, I tell you, myself and our auditors how important I think I am. And the more you are abased by my barbs toward you, the more pleasure I get (unaware, of course). In other words, the more pain we cause a child by ridicule or sarcasm, the more pleasure we receive. This is why so many junior and senior high school teachers will resort to shame, ridicule and sarcasm—the adolescent sufferer is so sensitive, oh, so sensitive! The unpardonable sin, from his point of view.

"Ridicule and sarcasm are poisonous weapons. They inflict wounds that never heal. They kill self-confidence and social courage. If we will put ourselves in the child's place we won't stoop to such meanness. Oh, yes, we might forget sometimes. Yet, if we keep on striving to be fair and just we will sin against the child much less frequently and less flagrantly."

**Practical Query Raised**  
 In several other states, before teachers' conventions, I have said about the same, during the last few months. Occasionally someone will raise this very practical question: How are we going to help the child learn to meet ridicule and sarcasm in life? What of the child who carries his feelings on his sleeve?

Let him learn to be "thick-skinned" by mingling freely with those of his own age. Let the tot as soon as he can toddle play freely with the other children his age in the immediate neighborhood, settling his own quarrels, fighting his own battles. The give and take and banter with those of his own age on the playground, in the homeroom of the high school, in the "bull sessions" of the dormitory or fraternity house, help him learn to "take it." He is on practically equal footing with the rest of them. But almost never can he have nearly so fair opportunity to "get back at" the parent or teacher. He may have to think of them as bullies.

## The World AND THE Mud Puddles

## APPLY THE BRAKES

Wall Street is not America, but when securities can lose from fifteen to twenty billion dollars of their exchange prices since September 1, there's a high degree of uneasiness at large which must concern everyone.

Nobody professes to know all the answers or the remedies to this, but behind the clattering ticker-taps and the hubbub of the exchanges you can find certain factors which undoubtedly played a part in sending stocks in their recent nose-diving.

Steel mills are operating at only sixty-three per cent of capacity. Clothing production, now in the midst of what is usually its peak season, has sagged. Automobile production is at a good level, but capital goods are ordered after thriving for the first six months of the year, have been curtailing orders since July.

Railroads find themselves facing their lowest operating income since 1932, and have been forced to stop orders for steel, lay off several thousand workers and cease manufacturing or ordering locomotives. Although rails have achieved many economies while at the same time improving service, increasing costs of goods—up thirty-six per cent since 1932—and recent wage advances of ninety-eight million dollars and thirty-five million dollars, apparently make substantial freight rates inevitable. The only other solution is government ownership, and politicians' management isn't likely to solve the problem.

However, the current economic picture has its beacon light. That's the down-to-earth consumer, who unmindful of the Wall Street flurries, has kept the retail trade of the nation humming at a pace of four to sixteen per cent more than last year's.

But the obstacles temporarily sidetracking recovery in big industry, do not appear to be insuperable. With government over-regulation in check, the factors making for recovery would soon vanquish all jittery nerves.

And it is up to the nation's representatives in congress to put the brakes on all this absurd legislative program of the president.

Dear Miss Markel: I am a poor girl about to marry a society man. Fearing his criticism, I need some general rules for planning my trousseau, some that will prevent my being either too gaudy or too plain.—Mac.

Answer: The amount of emphasis that can be used in dress depends first upon the personality of the wearer and secondly upon the occasion when the clothes are to be worn. You will be the chief center of interest and your clothes will serve as your background. You must be more striking than the average woman in order to appear to advantage against much more emphasis in your dress than does that same average person.

Generally speaking: Have your street clothes quiet and conservative, your sports clothes and evening clothes as striking as your personality, the occasion and your means permit. Such of your clothes as will be seen repeatedly by the same group of people should be less conspicuous than those which they will seldom see.

No Depression Being Experienced.  
Farm Income Is Down Slightly.  
Gold Burden Being Reduced.

By LESLIE EICHEL,  
 Central Press Columnist  
 NOTES ACROSS AN EDITOR'S DESK:

"What we have been experiencing is not a major bear market," says an exhortation from Roger Babson's organization. "It is a huge wave of general distrust and pessimism, in a longer-term bull market. Actually business is not nearly so bad as sentiment. The banking situation is excellent and investors not over-extended. Nothing is fundamentally wrong. We feel that the current contraction in employment is temporary."

"From the U. S. Bureau of agriculture comes the assuring word that farmers' total cash income for 1937 will approach nine billion dollars or 12 per cent more than 1936. After all, the world must eat. With bumper crops and high world demand, business should steadily expand for both home and foreign markets."

But we have had bumper crops previously, and much of the world has not eaten. Something WAS fundamentally wrong.

## FARM INCOME

Anyway, "it is now quite unlikely that the annual income (for U. S. farmers) will reach the nine billion dollars forecasted by the U. S. department of agriculture," says the Alexander Hamilton Institute. The income is estimated at less than \$8,798,000,000, which includes \$425,000 in benefit payments. Constantly falling agricultural prices are being reflected in manufacturing and on security exchanges.

Lower prices would be beneficial and would bring an even greater sum to farmers than higher prices if the United States and other nations would agree to exchange manufactured goods for agricultural products and raw materials. Nearly all the trouble in and among nations is based on the failure to get together on that.

## EXPORT TRADE

At that "export trade is at a new peak for the recovery movement," according to the Alexander Hamilton Institute. Or, at least it was till a month ago, when the worst of the recession set in.

But the very fact that export trade was at a peak caused weakness in securities. For other nations needed every available credit to finance their purchases and had nothing left for security investment.

The drain of capital on an importing nation thus even has repercussions on the exporting nation. As long as goods are not exchanged for goods, and money is not used merely as the token of exchange, the world will suffer severe financial reactions.

## GOLD EXPORTS

There need be no worry over the gold exports from the United States. The United States does not need this gold. The remainder of the world, except the Soviet Union, does need it. (The Soviet Union is the largest miner of gold.) In fact, the United States in buying gold is helping the world.

## TODAY Is The Day

Copyright 1937 Central Press By CLARK KINNAIRD

TUESDAY, NOV. 30.

Once Upon Nov. 30th—William Gilbert, who died in a plague, Nov. 30, 1603 (old style calendar) was eminent in his time as personal physician to Queen Elizabeth and King James I of England. He could have saved us from all those stories about Elizabeth being a man and the reasons she didn't marry, but he didn't. But he is one of history's immortals for a far different reason than his position at Court.

The electrical age was born because Gilbert became interested in what seemed as trivial a fact as one could imagine. He observed what many before him had doubtless noted without giving it a second thought—that a piece of amber when rubbed on its sleeve, gained the power of attracting lint or small pieces of paper. It led Gilbert into studies of magnetism, and he found that his property of amber was shared by other substances. He discovered, without fully realizing it, the principle of dynamo. He conceived that the Earth is nothing but a large magnet, and that it is this which explains not only the direction of the magnetic needle north and south, but also the variation and dipping or inclination of the needle.

The book Gilbert eventually wrote about magnetism was the first, and also the most important, systematic contribution to the science of electricity.

On Other Nov. 30th.—1867—Jonathan Swift was born in Dublin, four months after the death of his father. He was 59, and a minister, when he wrote the most famous of all satires, Gulliver's Travels.

1835—Samuel L. Clemens was born. He's only one of two American writers who used the nom-de-plume Mark Twain. The first was Isaiah Sellers, Mississippi river pilot who contributed sketches of river life to various publications when Sam Clemens was growing up. Sam didn't invent a new name for himself, but he did invent three profitable devices—an historical game, the adjustable strap for the backs of vests and waist-coats and a ready-gunned scrapbook.

1874—Winston Spencer Churchill, b. 1874. British soldier-author-statesman who is not to be confused with America's own Winston Churchill, the novelist. The British Winston Churchill wrote something that will outlive most novels written in 100 years—he wrote the abdication

ing gold to maintain its stability has had to borrow heavily to get the cash. Queer, isn't it?

## CUTS INTEREST BURDEN

Now, as some of the gold goes out, the United States government can repay some of the loans it negotiated to buy the gold. "It should be remembered," says the Alexander Hamilton Institute, "that the United States had \$12,804,000,000 of gold on Nov. 9, 1937, of which \$1,272,000,000 was held in the inactive account, and never became a part of the credit structure of the country."

The gold shipped to Europe, if taken from the inactive gold account would have the following ultimate effects:

First, it would result in a decline in the amount of gold held by the treasury in the inactive fund, and secondly, it would increase deposits of the treasury with the banks.

In other words, an outflow of gold would increase the working balances of the treasury, and thereby either make it unnecessary for

## New Relief Set-Up Is Scheduled January 1

While the law calls for the establishment of the new county relief set-up in Pennsylvania on January 1, 1938, it is likely that it will not be accomplished by that time. At the present time the law is before the courts for a decision upon its constitutionality and before anything can be done this must be clearly established.

If the decision is favorable the new set-up will probably be a money saver for such counties as Lawrence, due to the fact that sixth class counties have no poor boards, the work being done by the county commissioners, and the present county contributions for the Mothers Assistance Fund will not be necessary, the state taking it over entirely.

### Little Effect Otherwise

Otherwise the new law will have little effect here. If it goes into effect the procedure will be something like this. A relief board will be appointed by the governor. This board will have the appointment of executive and administrative personnel and under its supervision all types of relief will be administered from the one office.

The Mothers Assistance Fund which handles the assistance to mothers, to the aged and the blind would be housed under the same roof as the relief workers. All relief except institutional cases would be handled by the board.

Just what constitutes an institutional case is a problem not yet clearly solved. At the present time the county commissioners give relief to "outdoor cases," that is non-employables who reside in their homes instead of a state institution. One interpretation is that persons mentally or physically unable to work are to be classed as institutional cases. This would take in practically all of the outdoor cases of the county.

If this interpretation holds good, there would be no change in the present handling of county outdoor cases. If, however, institutional cases were only those now in institutions or who properly belonged in one it would reduce the work of the county welfare department.

It would also reduce the work of the county commissioners and, of course, the work of auditing the accounts.

The one benefit to the county under the new plan would be the obviating of the necessity of county contributions to the Mothers Assistance Fund. By the end of 1937 this county will have contributed about \$19,000 for the current year to this fund. Under the new set-up this would be saved, the state taking over this expense.

Up to now the meaning of the law has not been clearly explained. Both James E. Moorehead, executive director of the Lawrence County Emergency Relief Board, and Edwin O. Reed, county welfare officer, are agreed that some provisions are not clear and will need some clarification before the changes could be made.

the treasury to borrow in the open market or enable it to repurchase some of its outstanding treasury bills.

"Thus, an overflow of gold, if met through the active gold account, would be a very wholesome development."

"Even if the outflow of gold should exceed the total held in the inactive gold account, a development which seems improbable at the moment, the effect on the United States still would be beneficial, for it could be met through the Exchange Stabilization Fund. This fund holds \$1,600,000,000 in gold, which the treasury could utilize without in any way affecting the credit structure of the country."

### AN OBJECT LESSON?

There may be an object lesson in the fact that although the United States accumulated the largest stock of gold in the world's history, it suffered the most serious release in trade of any nation. Take all the gold away from other nations, pile it sky high, and you will not be wealthy; you will starve. The ancients learned that. Thus the fable of Midas who wished for the golden touch. He was saved from starving to death by a kind Magi who undid his wish.

WHITESBURG, Ky., Nov. 30.—As far as John D. Sloan, 69, can remember there ought to be thirty on hand at the reunion of his children next March 20.

"I thought it might be a good idea to get them all together once more," he said in discussing the plans. "Sometimes I get to wondering if I've counted just right."

Sloan's brood ranges from 3½ years to 52. Thirteen are still at his mountain home, but the rest have been scattered to other places in Kentucky and to the west coast, he says.

A former coal miner, Sloan has been married three times. His present wife has mothered eleven of the children, his second twelve, and his first wife nine.

## Opera Opens Up Its 53rd Season

(International News Service)

NEW YORK, Nov. 30.—Another season—the 53rd—was open today for the metropolitan opera with \$15,000 in the till and a distinguished audience more than satisfied with the performance of "Tristan and Isolde," one of Richard Wagner's popular music-dramas. More than 5,000 persons were turned away at the box office and few of the many hundreds who stood in line from 7 in the morning until curtain time, were able to get even the 400 "standee" tickets available.

Opening performance of the opera was conducted by Arthur Bodanzky, dean of the corps of conductors, who began his 23rd season last night. The company was headed by Kirsten Flagstad and Lauritz Melchior in the title roles.

## Believed Dead For 20 Years Returns Home

World Weary Enoch Arden  
Shows Up To Find Wife  
Remarried

WAS BELIEVED  
VICTIM OF WAR

(International News Service)  
SPRINGFIELD, Ill., Nov. 30.—A world-weary Enoch Arden packed up to resume his aimless travels today after a brief visit with his war bride, now remarried and the mother of a 17-year-old boy.

It was a shock when Haile Dagb stepped up to the home of Otis Jennings and his wife in nearby Edinburg. For 20 years she had believed him dead.

They were married in 1917 shortly before he sailed for France. Then came word that Private Haile Dagb of the Seventh Field Artillery, was missing in action.

She waited until the Armistice, then obtained a divorce and remarried.

Mind Foggy  
Dagb had been captured and spent the rest of the war in a German prison camp. When released he spent nearly two years in hospitals trying to rid his lungs of the gas and his mind of the fog that the fighting left.

Dagb started to go it alone in 1920. He said, "I didn't have much

idea what I was doing or where I was going. Somewhere I got the notion my folks were dead. My wife was only a strange memory. I just never got around to going back. Everything was still sort of foggy."

Becoming a steelworker, Dagb moved from one town to another, finally meeting an old acquaintance here, who told him of his former wife. Dagb went over and visited. He also found his father, now 76. But today, he said, "I guess I'll be moving along now. Where? Oh, no place in particular."

## New York City Weak Spot In Drivers Strike

(International News Service)  
NEW YORK, Nov. 30.—New York today was admittedly the "weak spot" in the strike of Greyhound bus drivers under way in 16 states, for only 40 of 80 drivers operating out of the city were out.

The admission came from James Breslin, Brotherhood of Railway Trainmen local president and in charge of strike activities in this city, but Breslin claimed that elsewhere the strike was gaining impetus.

Company officials admitted only that schedules to Philadelphia were off. Breslin countered with the claim that through lines to Richmond, Va., to Washington and to Boston all were tied up.

## Plan To Arraign Gerardo Machado

(International News Service)  
NEW YORK, Nov. 30.—Prevented by illness from appearing in U. S. court, Gerardo Machado, former dictator of Cuba, was to be arraigned in his hospital room today on an extradition warrant charging him with mass murder and the embezzlement of \$30,000,000.

The Cuban government charges Machado, before his flight to the U. S. in 1933, caused the massacre of 17 Cubans.

## Canaries--Like Girls--Must Diet

"DOC" MEYERS AND A TRAINED CANARY

"Like chorus girls, canaries must diet to keep fit for singing and entertaining," Julius W. "Doc" Meyers, world renowned ornithological expert told a reporter today in the pet shop department of the new G. C. Murphy company store, where he'll be all this week giving advice to canary and pet bird owners on how to keep the feathered friends healthy and happy.

"Doc" Meyers said overfed birds blood fills with carbohydrates which causes the feathers to loosen and fall out. He said the bird clogs up with fat and their song-organs can not function, so they stop singing.

Mr. Meyers, surrounded by his own performing canaries, puts on a first-class show for his friends while he expounds his suggestions. He's a scoutmaster and loves children and delights in imparting his bird-lore to youngsters.

Not long ago Mr. Meyers recognized as a leader in his field, lectured at Yale university.

The bird clinics in the Murphy store basement will continue all week.

## A. Sharp Leslie Will Complete Long Service

When County Detective A. Sharp Leslie completes his term of service on January 3, he will have completed a longer service in the office than any other county detective with the possible exception of the late Stephen Marshall.

Mr. Marshall served a number of years under successive district attorneys. Mr. Leslie has served under various district attorneys going back to 1916. In that year he was appointed by District Attorney Clyde V. Ailey, now deceased, and succeeded William H. Dunlap, who will take his place as a councilman in January.

Under Ailey, Mr. Leslie served for two years, 1916 and 1917. For two years he was out of police work but got back in, in 1919, when he was elected constable of the third ward. In January 1926 Mr. Leslie was

appointed assistant county detective under District Attorney J. Elder Bryan. In this capacity he served four years and another year as assistant under District Attorney John S. Powers. When Mont L. Ailey was inducted into service as district attorney in 1934, Mr. Leslie was inducted as county detective.

In his long career in law enforcement Mr. Leslie has seen some stirring times. There have been weeks at a time when he got to bed for but an hour or two a night. Many nights he has spent entirely, out on the highways of the county stalking criminals. By now he has reached the point where he can take his sleep or leave it alone.

He comes from a pioneer family of Lawrence county. His plans following his retirement as county detective are uncertain as yet.

able to catch one of the ropes in the shaft and thus broke the force of the fall. His hands were badly burned from sliding down the rope, and his leg is in a cast.

### City Officials In Harrisburg

In Conference On Effect Of New 44-Hour Week On City Employees

Newspaper dispatches from Harrisburg today report that the state has postponed on Wednesday until January 3, enforcement of the 44-hour week law. However, Mayor Charles E. McGrath, Councilman J. D. Alexander and Solicitor William D. Cobau today are at Harrisburg, first to attend a conference relative to the law with officials in charge of the administration of the new law.

They went to Harrisburg yesterday afternoon after it had been stated in council meeting that enforcement of the law here would result in an increased expenditure of about \$60,000 in wages to new employees who would be required. This, the council pointed out, would seriously affect the 1938 appropriations and would compel an increase in the tax millage.

### Track Dangers Told In New Bulletin Of Nation's Railroads

"Get off the track, Smokey—that's how I lost my leg!"

That message rang through local school classrooms and other public buildings today, for that warning message, in big black letters, went forth from a new safety bulletin which railroad leaders here distributed for the Association of American Railroads' safety division.

The bulletin pictures a dog racing after a speeding locomotive—with his master, a legless schoolboy with crutches, at his side.

Figures Tell Sad Story.

During the last 20 years, the bulletin reports, nearly 10,000 boys and girls have been killed and more than 16,000 seriously injured while trespassing either on railroad tracks or trains.

Between 1932 and 1936, inclusive, 678 under 14 years were killed and 884 injured; 1,473 between 14 and 21 years were killed and 3,222 injured.

Accidents and fatalities for the under-14 age group decreased from the five-year period preceding 1937, but the figures disclosed an increase in the 14-to-21 age group.

It's all right to defend freedom, but isn't it going too far when we defend an alien's freedom to break our laws.

### News Follows Them On Trip

Mr. and Mrs. William Wignall of Maryland avenue, who are at present vacationing at the home of Mr. and Mrs. Joseph Wignall, in Houston, Texas, gain much pleasure from The New Castle News which they have sent to them, while jaunting about the country, it is learned.

"It keeps us up on what is going on in the old home town and we would be lost without it" is the comment written back to relatives and friends here.

The Wignalls left here on October 28, visiting many points of interest enroute to their destination, Houston. The weather in Texas has been 85 degrees ever since they arrived and their trip so far has been a glorious one.

"We will be home soon, but in the meantime don't let The News slide, as we look for it" wrote Mr. and Mrs. Wignall.

## Hopes To Escape Electric Chair, To Plead Guilty

Young Man Who Killed Mother And Uncle Has No Money For Court Trial

(International News Service) PITTSBURGH, Nov. 30.—Francis Brookmon of Washington, Pa., who, police say, admitted killing his mother and her uncle May 22 because he was opposed to them "living in the same apartment" may plead guilty as a means of attempting to escape the electric chair, it was indicated today.

Brookmon, brooding in his cell, was reported to have told jail guards he has no funds to hire an attorney and "it doesn't matter anyway." The youth surrendered to police at Washington last Friday with the calm announcement he had killed his mother, Mrs. Mary Brookmon Need, 37, and her uncle, Paul Lustig, 48, in an apartment here. He fled and hitch-hiked about the country for several months before deciding to surrender, he revealed, according to police.

The two indictments charging murder and a 24-page statement signed by Brookmon were given to Judge Ralph H. Smith who ordered him committed to jail without bail after his surrender.

### Slashes His Wrists With Broken Glass

Frank Rodgers, Mental Prisoner, Attempts Suicide In County Jail

Frank Rodgers, a mental patient in the county jail, attempted suicide Monday evening by slashing his left wrist with a piece of glass. He obtained the glass by breaking an electric light bulb in his cell.

Prisoners saw him with the blood gushing from his wrist and set up a cry for the sheriff. Deputy Sheriff Connie Wardman responded, and in turn called Deputy Ben Hartland, who applied temporary bandages, and called Dr. Cleland.

When Dr. Cleland tore off the temporary bandage he found that an artery had been severed, and Rodgers was bleeding profusely. He was rushed to the hospital where his wounds were sewed up, and he is apparently suffering no serious effects today.

Rodgers has been in the county jail for some time, Sheriff Pritchard being unable to get treatment for him in any state institution.

### Court Renders An Opinion On Note By Robt. A. Reed

In an opinion filed at the prothonotary's office by Judge James A. Chambers in the case of the Jos. S. Rice Company, use of Helen R. Dagan against Albert J. Reed, administrator in the estate of the late Robert A. Reed, judgment is directed to be entered for the plaintiff

and against the defendant in the sum of \$317.

The action was based on a scire facias to revive the lien of a note signed by Robert A. Reed for \$300. It was in connection with the funeral expenses of Elizabeth Trax. The defense maintained that the note had been paid to Jos. S. Rice but had not been satisfied on the record before Mr. Reed's death. The note had been assigned to Helen R. Dagan.

READING TESTS

ARE BEING MADE

For the purpose of aiding children who have difficulty in reading a number of tests are being given today in the New Castle schools. A piece of apparatus known as the Betts machine is used and this ascertains just how efficient the student is in reading. Where eye defects are discovered, the student is advised to consult an eye specialist.

It may be social progress, but we have spent an awful lot of money just to make a different set of people mad.

# Relief Chiseling Will Be Checked

Investigators Busy Check-  
ing Over Relief Lists In  
Several Counties

Plan To Strike Names Of  
All Known Ineligibles  
From Dole Lists

## RELIEF CHISELING

(International News Service)  
HARRISBURG, Nov. 30.—Acting  
independently to reduce "chiseling"  
in relief, the state treasury depart-  
ment has decided to withhold checks  
from all persons on the dole lists  
known to be ineligible, it was learn-  
ed today.

Investigators from the treasury  
the week began a private investiga-  
tion into the relief rolls of several  
counties under orders to report on  
all persons found illegally receiving  
relief payments. From previous in-  
vestigations of forged and stolen  
checks the department already has  
considerable data on persons not  
legally qualified to receive the rolls.  
Ordinarily, all investigating and  
payment recommendations are made  
by the department of public assist-  
ance. Under the new permanent  
relief-assistance set-up, the treas-  
ury department is required only to  
make out the checks and disburse  
them to persons designated by the  
assistance officials.

**Withhold Payments.**  
However, the treasury is author-  
ized to withhold any state payments  
which it considers to be waste of  
the taxpayers' money.

Much of the furor over the relief  
policies of Earl De Schweinitz, sec-  
retary of public assistance, was pre-  
cipitated by treasury department  
investigators who discovered \$1,800-  
000 in relief money had been "lost"  
through over-paid, stolen and forged  
checks. In many counties prob-  
lems reported 30 to 35 per cent of the  
relief load was not eligible to re-  
ceive payments.

The treasury's course of action  
was decided upon several days ago  
when officials of the department  
met with other administration lead-  
ers. Prior to this it had been agreed  
upon to wait until Gov. George H.  
Earle's relief survey committee re-  
ported its findings Dec. 18. The  
decision was reached when F. Clair  
Ross, state treasurer, declared he  
would not sit by and see the com-  
monwealth's funds "thrown away",  
it was learned.

**NEW 44-HOUR  
WEEK DEADLINE  
IS POSTPONED**

(Continued From Page One)  
time to make adjustments. They  
will have until Jan. 3, 1938. After  
that the department will crack  
down on violators of the act.

**Other Rulings**  
Other important rulings and vari-  
ation classifications established by  
the board were:

**Continuance Operations.**—Em-  
ployers in continuous and multiple  
shift manufacturing and public  
utility industries working eight  
hours or less per shift may interpret  
the day to be the calendar day and  
the week the calendar week, provid-  
ed that such employees have a rest  
period of at least eight hours be-  
tween successive days of work. An  
employer may permit an employee  
to work one additional shift or tour  
of duty per cycle in these industries  
provided eight hours intervene be-  
tween the shifts and further pro-  
vided such changes will result in

tions; in industries in which the  
processing of products once begun  
is required to be completed without  
delay to avoid spoilage, and em-

ployees in other occupations when  
performing their regular duties  
away from the factory, office, or  
depot, provided such employees are  
permitted time to eat without dan-  
ger to health.

**Outside Workers.**—Employers of  
outside representatives may permit  
such employees to work in excess of  
8 hours per day and of 44 hours and

age of skilled labor exists in any in-  
dustry the department of labor and  
industry, upon application by an  
employer, may vary the required  
schedule of hours, provided that if  
such variation is approved time and  
one half shall be paid for excess.

**Posting Hours.**—Employers who  
maintain for inspection a compre-  
hensive system of time and payroll  
records and who find it impossible  
to fix definitely in advance the  
hours of employment of industrial  
workers may dispense with the  
posting of the schedule of hours.

**Office Buildings.**—Employers may

urday, and on the day immediately  
preceding a legal holiday on which  
employees are not permitted to work.

and may work for more than five  
and one half days a week provided  
actual working time shall not ex-  
ceed eight hours in any one day or  
44 hours in any one week.

Discussing the probable success of  
the new statute, Bashore said he  
believed the passage of a minimum  
wage law was necessary to insure  
the ultimate workability of the  
hours limitation act. In this con-  
nection Bashore said he would re-  
quest the governor to place such an  
act before the legislature should a  
special session be called.

**WASHINGTON AT A GLANCE****Vandenberg Is Skilled Speaker**

Recent Radio Address Makes Good Impression On Public Minds

**CARES NOT FOR PARTY LABELS**

Central Press  
Washington Bureau  
602 Times-Herald Bldg.  
By CHARLES P. STEWART  
Central Press Columnist.

WASHINGTON, Nov. 30.—Senator Arthur H. Vandenberg of Michigan made an excellent radio broadcast recently.

As an orator the Wolverine solon is much better than average. He is not as mellifluous as President Roosevelt, but he is forceful, sensible and very convincing.

He outlined a program which, he gave it as his opinion, would be a great improvement upon the Rooseveltian New Deal. His proposals were liberal but nothing to terrify reasonable conservatives. At the same time, they were not reactionary—nothing to scandalize any but the folk we are inclined to regard as outright radicals.

**VANDENBERG'S VIEWS**

Vandenberg, in short, is about as liberal as anyone whom conservatives are willing to put up with. On the opposite hand, he is about as conservative as anyone whom liberals are able to view with a fair degree of favor.

This may seem to classify him as a straddler.

He is not one. He has clean-cut ideas. He does not wobble.

He is not opportunistic. His complaint of Rooseveltianism is that it grabs at passing popularities. He does not. He says he does not and his record bears out his assertion.

**AS TO PARTY LABELS**

But the nub of the senator's broadcast was this:

He does not care for party labels. He is a Republican and is prepared to stay so, as long as Republican principles are in harmony with his own. If Democracy adjusts itself to what he always has deemed Republicanism he has no objection to being called a Democrat.

Or, if Fusion stands for what he believes in, he is a Fusionist.

**NEXT CAMPAIGN**

Now, the next presidential campaign in the United States will be fought between two fusion parties.

Upon one side there will be a mixture of Republicans and Democrats. On the other side there will be a mixture of Democrats and Republicans. Each may hang onto

an old name, no longer meaning anything, but they will, in reality, be two new parties—each fusionist.

Properly they should have two new names—Conservative and Liberal.

Probably they will not. Probably they still will designate themselves Republicans and Democrats. The realignment will be a fact, nevertheless.

Conservatism will not be as conservative as it used to be. Liberalism will not be as radical as the La Follette, the Farmer-Laborites and Senator George W. Norris would like to make it.

Still, there will be that new line of demarcation.

**CONSERVATIVE FUSION?**

Logically Senator Vandenberg should be the fusion presidential nominee, on the conservative (but not so VERY conservative) side of the crevasse.

Had he chosen to make a fight for the Republican nomination in Cleveland in 1936 he could have had it, most likely. He didn't estimate it as an opportune juncture to run, however. He was right, unquestionably. He wouldn't have been beaten so overwhelmingly as was Alf M. Landon, but he would have been beaten—and extinguished.

Now he may have a chance, in 1940.

**WHO WOULD OPPOSE HIM?**

Who will oppose him, as a radical fusionist?

President Roosevelt? If so, there will be a deal of hostility to the latter as a would-be third-term. That, among other things, would be in Vandenberg's favor.

Who else?

Well, for example, Mayor Fiorella H. La Guardia of New York.

Far be it from me to say that Mayor La Guardia would not be a formidable presidential candidate. Still, as between Vandenberg and La Guardia, will anyone say that the betting odds should be as pro-La Guardia as they were pro-Roosevelt, against Landon, in the last election?

Of course, it may be contended that Roosevelt and La Guardia are not the only Democratic 1940 availabilities.

Sure enough. But who are the others?

**PETITE SINGER HAS BIG PART**

Cecile Sherman To Sing Leading Role In "Haensel And Gretel" Here On Thursday

Cecile Sherman is blonde and small of stature.

When Humperdink's famous children's opera, "Haensel and Gretel," presented by Junior Programs, appears at Ben Franklin auditorium on Thursday, December 2 at 3 p. m., under the auspices of Lawrence Co. Parent-Teachers association, will be found singing in English the leading role in the German composer's adaptation of Grimm's fairy tale, "Babes in the Woods."

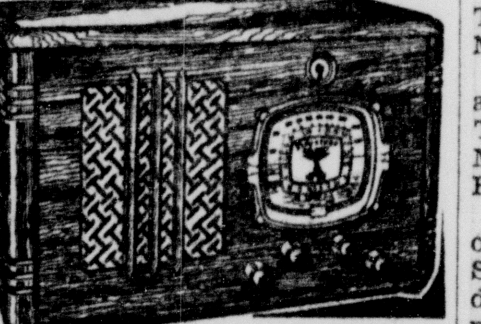

It is almost incredible to believe that this Lilliputian person is an operatic performer of the highest calibre. Besides possessing a bright spirit, a sense of comedy and a rare stage instinct, Miss Sherman's versatility has occasioned wide comment.

Running the gamut of Clo-Clo-San, Marguerite, Suzanna and Gerubino, Misella, Gilda, Lucia, Mimì, etc., in "Madame Butterfly," "Faust," "Figaro," "Carmen," "Rigoletto," "Lucia," "La Bohème," etc., bespeaks no small virtuosity for Cecile Sherman.

**Light Term Of Criminal Court Seen In December**

Indications are that the December term of criminal court will be light, judging from the number of cases now in the office of District Attorney M. L. Alley. Prior to the sentence court of Saturday there were 60 cases, of which 14 pleaded and were sentenced.

Of the 46 cases now in the office, a number are for desertion and non-support, which do not come up on the criminal calendar. Aldermen and justices of the peace still have over a week to return transcripts.

# Cochran Ends Long Stay Here

London Producer, Reared In America, Has Produced Many Hits

NEW YORK HAS RHUMBA CENTER

By O. O. McINTYRE  
NEW YORK, Nov. 30.—Charles B. Cochran, the London producer, has just wound up a long visit to America. He is picturesque in the theatre in the manner of Ziegfeld, Erlanger and Dillingham.

British born but reared in America, he has spent much of his professional life in London. He began in the manner of W. A. Brady, sponsoring from rags to riches melodramas of the Vanquished ten, twenty, thirty with O. O. McIntyre sideline excursions into dime museum experiments. Incidentally he and Brady are old cronies, having first met at the ringside of the Corbett-Fitzsimmons fight.

Cochran has lived so long in England he has a full blown British accent. As top impresario in Albion he has produced more hit shows than any other. He once had five successes running simultaneously. Among his outstanding smashes was Noel Coward's "Cavalcade."

Like Ziegfeld and his man Sidney, one of the closest confidants of Cochran is his valet, who is constantly within call. The producer is in his 60's but looks no more than 50. Too, he has all the energies and enthusiasms of the newcomer to the theatre.

Garden called Club Yumuri. Mostly the patrons are the sleek-haired Latinos and their high-combed ladies who take the dances seriously—dropping in for dinner and never missing a number. There are many finished exploits of the ace Cuban dance caper, but leading the pack at the moment is Joseph Schenck of the movies. With Orson Munn, socialite, two jerks and a twitch behind.

Kermit Roosevelt is the least clothes-conscious of the famous clan. He will have no truck with dandyism and almost has to be hog-tied to get him in a dinner jacket. Even then, if he isn't watched he is liable to fare forth with a pair of blue serge pantaloons and tan oxfords. His necktie is always lacking several hitches and his belt-held trousers appear likely at any moment to slip from their moorings. Incidentally, young Teddy Roosevelt has become far more popular of late. He has always been in a tough spot as the result of acquiring the name and inheriting many mannerisms of his illustrious father. A devoted family man, he is unusually chummy with his sons and especially thoughtful of his widowed mother. Associates in business also sound his praises.

I've often thought Tullio Carmanati, the well-dressed fellow of the movies, gets more genuine enjoyment out of dressing up than anyone. I used to run into him rather frequently on the avenue at the 5 o'clock hour of strut. Every appointment of his wardrobe was just so. One could imagine a full half hour in attaining the proper tilt to his hat. The loop of his wine-colored four-in-hand was a miniature sail gracefully bellying a breeze. His lapel flower and set of his breast pocket kerchief were simply perfection. All the little things so essential in Brummeling stressed—the wrist flap of the glove turned back to the right fraction and his collar and spats as snug as paper on the wall. To one who often tried for the same sartorial splendor only to glance back during a promenade to behold a dragging garter, he was an inspiration. A realization of wish fulfillment.

Few know the struggles his wife, Betty, had to make Will Rogers dude up a mite. His favorite costume, the one he loved to wear around his enormous ranch, was a pair of washed out overalls and faded blue work shirt. He received many dignitaries who dropped in, while so bedecked. Now and then Mrs. Rogers would catch him trying to slip off to town and would force him to spruce up. He would wear a necktie until it was sneaked from him and he never went to a tailor in his life. Generally he bought a hand-me-down, leaving the old one and wearing the new right out of the store. Albert Einstein is another careless dresser in the fields of genius. He often roams the town without a necktie and wearing shoes that are not mates.

Utopia Around the Corner Note: One of those early morning whistlers was on the loose today—the first I've heard in several years. He was whistling the Mocking Bird with variations. From my window he caught my friendly wave, grinned and went spang back into his aria. Maybe the world is all right after all.

## New Legislative Acts Will Get "Acid Testing"

Most All Of Earle's "Liberal" Legislative Acts Are Being Contested

(International News Service)  
HARRISBURG, Nov. 30.—Much of Governor George H. Earle's "liberal" legislative program will receive the "acid test" in Pennsylvania courts within the next few weeks, a survey disclosed today. Tangled in the state judicial machinery—most of them being contested on constitutional grounds—were the following acts passed by the 1937 session of the legislature: The public assistance law providing for "ousting" of county poor boards; the chain store tax act, the railroad employment law known as the full crew act, the teacher's tenure law, the liquor floor tax act, the new election code, the little NRA code for used car sales, the pawnbrokers act and the mortgage deficiency judgment law.

Most of the important legislation has been acted upon by the lower courts and is now awaiting final rulings from the state supreme court. Some rulings were expected this week.

Injunctions have been granted by the lower courts prohibiting enforcement of the full crew law and the chain store tax act. The teacher's tenure law, which protects some 50,000 teachers against summary dismissal, was upheld in the lower courts and appealed to the higher tribunal.

## Gunderman Asks To Be Paroled

(International News Service)  
SOMERSET, Pa., Nov. 30.—Stacey Gunderman, former state trooper convicted of second degree murder in the alleged "third degree" death of Frank C. Monaghan of Uniontown, on Monday asked Supreme Court Justice George W. Maxey for a parole.

The petition was forwarded to Justice Maxey after being presented in court by Joseph Levy, of counsel for Gunderman, sentenced to a year less a day by Judge Maxey, who announced he would have granted him a new trial would it not involve such an expense to Fayette county taxpayers.

## Confesses Two Bank Robberies

(International News Service)  
BALTIMORE, Nov. 30.—William Charles Ney, 37, an electrician of Bellaire, Ohio, confessed to police today, they said, that he twice robbed the Peoples bank at Tiltonsville, Ohio, once in 1930, when the bandit got \$322, and again last October, when he said, he got about \$900. He made his alleged confession after police became suspicious of his actions and questioned him. He had been living at a hotel. He

said he has a wife and four children. Police found a lumberjack and a pair of brown trousers in Ney's room. They said the garments answered the description of those worn by the last bandit who held up the bank. Ney claimed he threw away the pistol he used in the robberies.

Police said he reported Harry Merkle was clerk at the bank during his first robbery. He said Merkle knew him but did not recognize him when he made him lie down in his cage.

## Cut-Price Milk Going Down

That quart of milk, obtained at 8 cents from a New York City settlement house, didn't even last until little Paul Stanley could get home with it. The temptation was too much for him. Hundreds of New York poor were treated to the low-priced milk, and needless to say, sales were brisk.

## Always Near When Trouble Breaks Out

There is an adage to the effect that, whenever the country is in trouble there'll be a Marine on the scene. The same applies to a local officer whenever trouble breaks out. The policeman has been on the force about 23 years and he has had sufficient experience to fill a book. He is Patrolman Tommy Lynch, who, at different times has ably fulfilled a detective's role.

Tommy, as he is familiarly known to thousands, was named to the police force about 1914 and since that time has worked on all the beats, worked on all kinds of cases, brought a large number of them to a successful conclusion and is one of the most alert members of the department.

In his younger days he worked in the First ward when a section south of Washington street, north of the Neshaunock creek bridge and west of South Jefferson street, contained some tough customers. But there was not one of them too tough for Lynch as they all found out.

Whenever any of them attempted light, they were caught, because Lynch had and yet has the reputation of being the most agile man in the city. Time and again the chase and pursuit has extended for blocks and blocks but the chase usually ended up with Tommy bringing in his man.

One of the tightest predicaments Lynch had to face was when he was called upon to capture a man who was a dangerous character in the First ward. The doors were locked and no answer to repeated knocks by officers, armed with a warrant, came from within.

Know What To Do  
Finally it was decided that Lynch, a slim bluecat, should be shoved through a narrow window. The window was raised and Lynch was hoisted to the window. He was edg-

ing his way into the window when the wanted man inside, darted at Lynch with an iron bar.

Most persons would have edged backward from the window, but not Lynch. He reached behind, pulled his revolver and pointed it at the man, holding him at bay. Lynch worked his way through the window, into the room, unlocked the doors and the man was captured, jailed, sentenced and served his time.

This was only one of innumerable incidents where Lynch proved to be alert and knew just what to do to protect himself. On other occasions has he battled much bigger men without the aid of a mace and brought them to the place where violators belong.

Relative to murder cases, Lynch has worked on lots of them. As a patrolman on all such cases that have come up during the past score years, and it was he that spotted a fugitive attired in woman's clothing and a wig, fleeing the city. Pickpockets have fallen into his lap and a gang of auto thieves which operated here, were caught as the result of his vigil.

His length of service, in the capacities in which he has served, has resulted in having been assigned to their solving. He has had good results and the fact remains that on his Moravia street and Eighth ward beat he now protects, people have a good officer.

## AROUND CITY HALL

Mayor Charles E. McGrath, Councilman Joseph D. Alexander and Solicitor William D. Cobau are at Harrisburg and some time this afternoon they should know what they must do, relative to the 44-hour week law, which it was said during council Monday would cost the taxpayers \$80,000, more than heretofore to operate the city, if the law is obeyed. It was indicated some days ago by Councilman J. M. Rice that, should the city be required to obey the law, he might close several firehouses instead of employing more firemen. He said Monday that to obey it would require more than two dozen more firemen. Mayor Charles E. McGrath stated more police would be needed and it was also stated that more garbage collectors and other municipal employees would be necessary.

The public will eagerly await the opinion of Solicitor William D. Cobau relative to the statement made in city council meeting Monday that rent is being paid by occupants on property to which the city holds title. The rent has not been paid to the city, neither has the taxes on the properties, according to the statements. This situation was discovered by Paul Marakas, who collects delinquent taxes.

Judging from the numerous reports received recently it is time for someone, whoever's duty it may be to scan streets and sidewalks and have the city exercise prevention before cure. Whenever a person falls over an obstruction on a sidewalk and injuries result the person usually seeks redress at court. When the city is found liable it is the taxpayers money which is the balm.

No Special Weeks During December

Christmas Is Only National Celebration Observed During Month

December is one of the most unique months in the year, due to the fact that there is only one great holiday observed during the entire month, that being the birthday of Christ. It is observed in every Christian country on the face of the earth, however.

While every other month has some special week, a number of special holidays, business and sentiment alike concentrate on the observance of Christmas as the one great day.

We have "Father's Day" and "Mother's Day," and days for this and that, beside national "Boy Scout Week," and "Prevention Week," etc., but during December, these things are forgotten as everyone looks forward to Christmas Day.

The last special week of this kind which will be observed in the United States is "National Property Week," which is being commemorated this week. After that we will have to wait until the new year to start our observances of national weeks and days, again.

Steel Tops For Autos Cut Thefts

Police Authorities State Thefts Have Been Cut Since Steel Tops Came In

When the manufacturers of automobiles introduced the all-steel body, with its steel tops, they not only made a great step forward in reducing deaths from automobile injuries, but they also reduced the number of thefts of automobiles something like 25 per cent, it is reported.

The trained automobile thief, those who make the stealing of cars a racket, can start an automobile easy enough, even if there is no key to the ignition switch, but they first have to get into the car. When the car is locked, they will poke a hole in the roof of the car if it has a wooden or canvas top, and push down the door lever on the side which is not locked. From then on, things are comparatively easy.

With the all-steel body, however, they cannot poke a hole through the roof of the car, and consequently cannot gain an entry to the vehicle if it is locked.

## Split Ballot Good Says Supreme Court

Upholds Ruling Of Philadelphia Judge In Election Contest

In a decision handed down by Acting Chief Justice William I. Schaffer of the state supreme court, the validity of a "scratched" ballot is upheld. The ruling states that where a voter marks a cross in the straight party column and then marks for individual candidates of other parties, his vote must be counted for the individual candidates so marked and for all other candidates of the party ticket he marked on the left hand side of the ballot.

The case came up to the supreme court from Philadelphia where attorneys for the Republican party had argued that scratched ballots were good only for the individual candidates. Judge Albert S. C. ## Baseball Moguls At Milwaukee For Annual Sessions

Still Report Medwick Going To Giants For Ott, Schumacher And Mancuso

MILWAUKEE, Wis., Nov. 30.—Rumors of trades and "deals" continued to pile up here today as the big shots of baseball gathered for the annual confab of the minor leagues.

Although the meeting is held ostensibly to discuss minor league business, major league representatives are on tap to put the snatch on any available stellar material.

All of the 16 big league clubs are expected to be represented as the conference officially gets under way tomorrow.

According to the rumors several deals have already been completed. One of these has the Chicago White Sox already in control of Harland Clift, ace St. Louis Browns infielder. Another was that the St. Louis Cardinals have traded Joe Medwick to the Giants for Mel Ott, Hal Schumacher and Gus Mancuso.

The rumors, however, covered the same old names that have been knocked around the sports pages ever since the world series came to a close. If rumors are to be believed, Medwick is to be swapped to everybody ranging from the Chicago Cubs to Yale.

Inssofar as the minor league convention was concerned, the big business before the house was the creation of class "E" circuits and the proposal to tighten rules relative to the recruiting of college players.

## COURT CLINIC AT PENN STATE

Players And Coaches Will Attend—Former Titan Stars Will Aid Lawther

(Special To The News)  
STATE COLLEGE, Pa., Nov. 30.—Advance registrations indicate that the Penn State wrestling clinic, which will be held December 11, will have many of his former Westminster court stars to assist him. Lawther, before coming to Penn State last year, coached the Titans for 11 seasons and lost an average of only three games per season.

Among the former Titan stars who will return to help Lawther are Babe O'Donovan, Tudor Lewis, Johnny Henry, Phil Rice and Bill Douglass. O'Donovan, a former All-American forward, will take charge of a demonstration on "jump ball formations."

One of the sessions which will be particularly important for the visiting coaches and players is the period set aside for a panel discussion of the new rules, to be led by Dr. Frank Maguire, state director of physical education.

Birney Crum, Allentown mentor, will discuss the rules from the coaches' viewpoint; H. L. "Pete" Stuart, prominent high school referee, from the officials' viewpoint, and Richard W. Grant, head of the college's department of music, from the spectator's angle.

Plans are almost completed for Penn State's wrestling clinic, which will be held December 11. Charlie Speidel, Lion coach, who is formulating the program, has announced that Bill Stark, Bethlehem's "dean" of high school wrestling coaches, will assist with the clinic, along with Wilfred Cann, former American Olympic coach, and probably Paul Spitzer, New York Athletic club official.

## Fordham To Get Rose Bowl Bid Walsh Declares

International News Sports Editor Of Opinion Fordham Has Been Given Nod

By DAVIS J. WALSH  
International News Service Sports Editor

(Copyright, 1937.)  
NEW YORK, Nov. 30.—To every practical purpose, Fordham university has been officially invited to play the University of California in the Rose Bowl football game on New Year's Day, the writer has learned today from sources he believes to be thoroughly reliable.

Announcement to this effect is being held up a day or two and probably won't be made for another 48 hours.

But the match is virtually made. It only needs the final word from one team and a nod of the head from the other. As I get it, the California authorities have gone pretty far with Fordham; in fact, almost too far to turn back now, without offering a gratuitous slight.

Vote Against Trip.  
Whether an intimation of this already reached Pittsburgh and Alabama, the other ranking candidates, I'm not in a position to say. Neither do I know whether a belief that Fordham was to be named had anything to do with the reported meeting of the Pitt squad yesterday in which the players were alleged to have voted against the trip by 16 to 5.

There have been indications, however, that Alabama has had no deep and abiding illusions about being invited. The belief, in fact, is fairly general that the coast resented some blunt remarks attributed at this time last year to Coach Frank Thomas of Alabama, who himself was resenting the fact that unbeaten Pitt was picked them instead of unbeaten Alabama.

This time, all three of the leading contenders for the bowl bid have finished their seasons unbeaten. Alabama has gone even further, winding up unbeaten and untied. Pitt and Fordham each show a tie in their season's records, but this hardly matters because it came against each other. On the face of it, with victories over Duke, Notre Dame, Wisconsin, Carnegie Tech, Penn State and Nebraska—a better record than Fordham's—Fordham is strong.

The latter's greatest performance came in its scoreless tie with Pitt. It also defeated Texas Christian, 7-6; North Carolina, 14 to 0; Purdue, 21 to 3; St. Mary's, 7 to 0; and wound up the other day with a 20 to 7 win over N. Y. U., which the year before had beaten the Rams out of the bowl bid. The latter have a superior team this year with a better and more agile back and a truly great center in Wojciechowski.

Yet Fordham hasn't been quite able to capture the national fancy as Pitt has during 1937. Nor does it seem to have quite the general flourish and gallop of Alabama with its ability to come on in the last period and take the tight ones, notably in its recent games with Tulane and Vanderbilt.

Jeffersons Cop South Side Title  
Jeffs A. C. Emerges Out Of Mud With 7-0 Win Over Fardales

Battling on a field that looked more like a swamp than a gridiron, the towering Jefferson A. C. football team won a 12-7 victory over the Fardales to cop the South Side title Sunday afternoon on the Rosena grounds.

In the initial period, Birdie Biondi flipped the soggy oval to Flashy Zingaro, who scooped down the field for 40 yards and a touchdown.

In the second stanza this same Biondi laid faded back and tossed the ball to Ray Micaletti, former New Castle high ace, who tallied. The Fardales scored in the third quarter, Tommy Fazzone breaking loose for a 20-yard run. A pass, Covelli to Isaac, was good for the extra point.

The lineup:

## Rambling Around In Local Sports World

During the past gridiron season, New Castle Red Hurricane machine crossed the land where touchdowns bloom for 98 points. The opponents score 45 markers, Washington high being the only club to annex more than one touchdown.

For the tenth annual year, Andy "Coots" Venditto will appear as a basketball coach here. He started back in '27, piloting the Sacred Hearts. His teams have won two church league titles at the Y. M. C. A. and two independent titles.

It has been estimated that more than 10,000 fans have watched independent teams battle here during the season. New Castle was loaded with college athletes over the week-end. Andy Lasky, Andy Beres, Jack Hitchens, John Uram, Chuck James, Willie Ciccone, Walter Kominic, George Mike, Frank "Tarzan" Crisci, George Vargo, John Cabas, Charley Mort and Walt Raszkowski were among the former New Castle high stars who visited the city.

George Mike, one of the greatest gridders in the history of West Virginia Wesleyan, ended his career last week. Ben Ciccone, local pro playing with Cincinnati, will appear with the Ohioans when they play in Los Angeles, Cal., soon. Ciccone has played "pro ball" with Pittsburgh, Cleveland, Philadelphia and now is with Cincy. In a week or so the sound of the basketball sailing thru the cords will replace King Football here.

Odds and ends. Santa Clara boasts an expert "coffin corner" punter. Chuck Pavelko, the kicker extraordinary, perfected the art by aiming for a barrel stationed at the corner of the gridiron. During a practice session, Pavelko kicked the hog-hide into the barrel twice.

One lad on the Wisconsin university basketball team is 6 feet 9.34 inches in height and weighs 200 pounds. Louisiana State university football has a mascot—Mike the tiger, weighing 200 pounds.

## TALES IN TIDBITS

By BILL BRAUCHER  
Central Press Sports Editor

Now that the football season of 1937 is ended, captains of college football teams in every major conference in the country are selecting what probably is the most authoritative All-American team of many annually chosen.

Clint Frank of Yale, Joe Rinaldi of Michigan, Joe Zwers of Notre Dame, John Druze of Fordham, LeRoy Monksy of Alabama, Merrill Davis of Dartmouth, Jim McDonald of Ohio State, Maurice Kirk of Missouri, Wayne Soffe of Brigham Young, Charley Williams of U. S. C., Mason Mayne of Texas Christian, Honey Hackney of Duke, Herb Hundl of Drake—these are a few of the men who have cast their ballots.

Since University of Pittsburgh has no permanent captain, a consensus of the players was taken.

This will be the eighth annual All-American team to be selected by the playing leaders themselves, the men who have fought their schedules through down on the field. Central Press originated the idea of the Captains' All-American in 1930. The purpose was to let the young men who ought to know best, by personal experience, have a choice in determining the Who's Who of the gridiron.

Picked by men who have tested the mettle of dozens of opponents in the heat of action, and who know best the merits of their own men by playing at their sides through a schedule of arduous games, the Captains' All-American is as authentic as the steam in a locker room after a big game. The captains know the men who really are

the stars. They know who deserves the credit often mistakenly given by observers to another man. In every game, and especially football, the competitors themselves are best able to gauge the worth of an adversary or teammate.

Annually the Central Press Captains' All-American has gained in prestige. At many universities selections by the captain have become a tradition. Players recognize this kind of an All-American "election" as authentic.

Each captain to whom a ballot is sent is requested to name the best players he has seen during the season as a teammate or opponent. Some pick a complete team. Others name only two or three men. Thus, this year Joe Rinaldi of Michigan picked only two men, Uram of Minnesota and Heap of Northwestern.

The fairness of captains has been indicated every year by the fact that few pick their own teammates. When they do name their own players, the results are inevitably proved accurate by the choices of other captains in the conference or on the schedule.

Two years ago a couple of the captains named themselves. But the fact that they were All-Americans who happened to know their own worth and were not curbed by any false opinion of themselves was borne out by the voting of the other captains and by their own subsequent professional players.

If the captain picks himself mayor he knows what he is talking about!

## Hear Report On Plant Outlook

New Castle Works Employees Get Reports Of S. W. O. C. Conference On Plant

## FACTS PRESENTED MONDAY NIGHT

Employees of the New Castle Works, Carnegie-Illinois Steel Corporation, met in Glendon hall Monday night, November 29, and heard a report of a committee that recently went to Pittsburgh and conferred with the heads of the S. W. O. C. there concerning the future of the New Castle plant.

David Clements, president of the New Castle Lodge 1216, acted as chairman of the meeting and introduced Joe Booth and Jack Grizzle, who had been a part of the committee. Both of them explained that they had been in conference with Clinton S. Golden, regional director of the S. W. O. C. who told them that he had conferred with Carnegie-Illinois officials.

The report of the conference was that Golden informed the committee that the New Castle plant was scheduled to be abandoned along with Monessen, Ellwood, Indiana, and Guernsey Works. Some of the older employees of the New Castle plant will be absorbed by the Shenango plant, it was said, men of less than two years' experience in Shenango being removed to make way for the New Castle men to be absorbed. It was estimated that between 200 and 300 would be involved in this.

Men of less than two years' service in the New Castle plant were advised last night to discontinue their group insurance, and the statement was made that the money in the relief fund would be divided pro rata after certain obligations now in effect were taken care of. It was said that the relief checks would be paid out sometime before Christmas.

Gains in the rails ran from 1/2 point and more. Utilities showed slightly lesser margins over last night's closing.

## Colored Dancing Star Is Married To Rich Frenchman

Josephine Baker, Of St. Louis, Weds White Man For Second Time

By KENETH T. DOWNS  
International News Service Staff Correspondent

PARIS, Nov. 30.—Josephine Baker, the noted colored dancing star who swept from obscurity in St. Louis to fame and fortune in Europe, was married today to Jean Lyon, rich French wholesaler and aviator.

It was Miss Baker's second marriage to a white man. Her first husband was Count Pepito De Albertini of Rome.

The 31-year-old dancer and the wealthy industrialist were married at Crevecoeur-Le-Grand, department of Seine-et-Oise, early this morning. Mayor J. M. y Schmidt, a member of the Chamber of Deputies, officiated.

Will Tour Europe  
M. Derval, director of the Folies Bergere where for the last year Miss Baker has sung and danced in the starring role at the highest theatrical salary paid in Paris, acted as witness.

The couple breakfasted at Chateaubriand before returning to Paris by automobile.

Miss Baker and Lyon had been acquainted for several months, but even their close friends had no idea they intended to be married.

It was understood the romance grew out of their mutual interest in aviation. Lyon taught Josephine how to fly, and she was only recently awarded her pilot's license.

The couple plan a tour of Europe when Miss Baker's show closes at the end of the year.

## Installing Drains At New Airport

While the work of blacktopping the airport at Parktown Corners is held up by the weather, some work is being done there by the WPA forces, Manager Walter N. Todd stated today. Drains are vitally important to the life of the runways and these drains are being installed.

## PARENTS TOLD TO TRAIN CHILDREN AT DINNER TABLE

(International News Service)  
BOSTON, Mass. — Training of children in intellectual and spiritual subjects can be best accomplished by parents at the dinner table. Dr. Wakefield Sharpe, pastor of the Wellesley Hills Unitarian church is authority for this statement, made by him during an address before the Massachusetts Parent Teachers Association.

"Sitting around the dinner table at night the parent has a chance to be with his children and to direct their minds to subjects of intellectual and spiritual value," said Dr. Sharpe.

Getting rid of bad people would help, but the ones considered good are responsible for most of the mess we are in.

## WISCONSIN'S NEW PRISON FOR WOMEN—NO BARRED WINDOWS HERE

It's a new deal for Wisconsin women prisoners. For the new prison at Taycheedah, near Randolph, is not what prisons have been. It is a "livable" dormitory-like building, with no barred windows or high walls. Here 104 inmates bask in the sun or roam the landscaped grounds during recreation hours—not under armed guard, but with one of the 19 co-operative matrons in charge. The rooms are like "one's own". Fresh air and sunshine are accessible. Here the occupant may display cherished photographs, care for plants and flowers of her own. Woven rag rugs are on the floor. The bed is comfortable.

## Weather Halting Work At Airport

Blacktopping May Not Be Completed Until Early In Coming Spring

Unless the weather breaks, which seems unlikely, the blacktopping of the airport runways at Parktown corners is all through until the spring, according to Walter N. Todd, manager of the local office of the Works Progress administration.

The blacktopping can be poured only when the temperature is above forty degrees and this usually when the weather is dry. Getting dry weather above forty degrees for the balance of the winter seems highly improbable.

The work of topping the runways is about 40 per cent completed. The north and south runway is done from the edge nearest the Youngstown road to the intersection. About 600 feet is completed on the east and west runway.

Likewise the roofing of the Joseph V. Cunningham armory is being slowed up. Some work has been done but this also depends upon weather that is well above the freezing mark.

## Soviet Plans To Play Lone Hand

By JAMES E. BROWN  
International News Service Staff Correspondent  
(Copyright, 1937)

MOSCOW, Nov. 30.—While continuing to pay lip service to the principles of collective security, Soviet Russia has definitely decided to play a lone hand in international affairs in the future, it was learned on highest authority last night.

Angered by failure of the Brussels conference as well as England's overtures to Germany and her De Facto recognition of the Spanish insurgent regime, the central executive compelled Foreign Commissar Maxim Litvinoff to make his speech at Leningrad renouncing the policy of collectivism he favored for years.

## Heiress Marries Former Jockey

Miss Helen Wolcott Bedford, Heiress To \$40,000,000 Weds On Monday

(International News Service)  
WESTPORT, Conn., Nov. 30.—Attracted by their mutual admiration of horses, Miss Helen Wolcott Bedford, 24, socialite heiress to a \$40,000,000 standard oil fortune, on Monday became the bride of Arthur

McCashin, 30, former steeplechase jockey and groom of the Bedford Farm stables.

The ceremony, performed at Bankrock, palatial Bedford estate, was attended by 50 invited guests—close friends or relatives of the couple.

The Rev. Charles Lillis of Seton Hall, South Orange, N. J., officiated, assisted by the Rev. R. J. Carroll, pastor of the Church of Assumption of this city.

The couple will motor through the South on their honeymoon, it was announced, and return to occupy a large seven-room farmhouse on the estate.

The bride is one of the most widely known horsewomen in the East. The bridegroom won fame as a steeplechase rider before coming to the Bedford estate.

## Noted Here And There In Other Newspapers

A little 'possum got tired of country life, the other evening, and so made an exciting excursion to downtown Beaver Falls. The dusky gray fellow, whose kind usually shuns the bright lights, paddled in to a drug store, right through the front entrance, and upon discovery promptly played dead in a dark corner at the rear of the establishment. He was picked up by a patron of the store and placed in a box. The animals have been known to make good pets and in such a role the little nocturnal prowler will likely spend the rest of his days.

A woman telephoned a Chicago police station and said: "If you see a man in his shirt sleeves running down the street, that's my husband chasing a holdup man." Sure enough, some minutes later the police saw a coatless man on a street car pointing at a trolley car. The squad overtook the trolley and captured a man who admitted robbery of a wallet and ring.

Women residents of Greenbelt, Md., an ultra-modern, model village sponsored and built by the federal government, are embarrassed by outdoor clotheslines, it seems, and they wish there were some way of having more privacy for their scanties. In a letter to the community manager, and signed "Sally Rand", one of the housewives had

this to say: "I just don't know what to do about my brazen outdoor clothes line. It is so public out there in the great open spaces. I've always dried my tid-bits of intimate apparel on the towel rack in the bathroom, but this public display makes me feel as if I were doing a strip-tease act."

Patrolmen Albert White and Charles Miller of Philadelphia "subbed" for the stork again this week. It was the eighth time the two burly cops have officiated at the birth of a little one in the regular course of duty. A police radio call sent the policemen to the home of Mr. and Mrs. Charles Macey. There was no time to do anything but help

bring the Macey child into the world, White explained in his report.

A New Testament was the only movable thing left in the automobile of Rev. Clyde H. Canfield by those who stripped it following its theft from Tarentum, Pa., last Saturday. Removed from the machine, which was insured against theft, were the radio, heater, generator, carburetor, battery, seat covers, horn button, oil filter, lid of the gasoline tank, a pair of gloves and a pair of eyeglasses.
